LETTERS TO THE EDITOR

New trees look great

TO THE EDITOR:

On Nov 29, I sent an email to Tom Hastings telling him that I was impressed with the trees he had just planted in our backyard. All along, I have had misgivings because the mix-growth woods had been destroyed; and I was hoping for some type of vegetative screen for protection and privacy between the properties. I never anticipated, however, that Tom would plant such beautiful, big specimens; and I was quite pleased. This helps mitigate an adverse situation for me and my neighbors.

In addition, in an email response written the same day, Tom stated: "We still have more specimen trees to plant over the next two weeks. Also over the next two weeks we will finish the swale and hopefully, weather permitting, be able to hydro-seed. Next spring we will finish the landscaping of the swale and the bank on our side."

The weather was in our favor and (although I am not absolutely certain) it looks like the hydro-seeding is finished. I look forward to the total completion of this landscaping, which should provide additional privacy for residents of building 20 in Beal's Cove Village.

I want to take this opportunity to thank the town boards, again, for their responsiveness to my concerns.

Charlotte Z. Krouner
